

ON THE BEACH

ARTONIK

At the first rays of sunshine, facing the sea and the other, they are overwhelmed with cruelty.

The morning dispels alcohol hazes and sand grains become thousands touches of madness. Children games turn into adults games... Forbidden games.

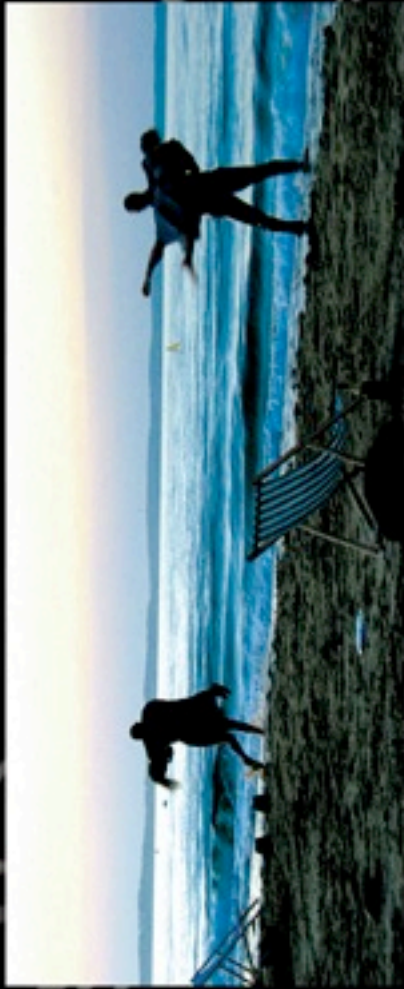

“On the beach” focusses on indifference and individualism of the gilded youth through six characters - women and men - who look at each others, flaunt and expose themselves, seduce, repel and tear each other apart.

This wordless proposition is based on a realistic interpretation mixed with contemporary danced moments full of gravity, humour and cynism.
